Intelligent design, mutual accountability

We feel honored and privileged to share with you that ATOS LOCKS, which we started in 2006, has successfully come to where it stands today with your full support. Since inception, we have focused and advanced on three areas; (i) diversifying our products, (ii) utilizing the best technology available and (iii) maintaining the highest quality standards.

We operate out of our 1,600 square meters production facility located in İkitelli Esot Industrial Zone, Istanbul. Our production quality meets the internationally recognized ISO, RoSH and ASTM B117 standards. While we continuously work with 700 companies domestically, we also export to 15 countries. Our company sees a great value in presenting our products both domestically and internationally. Therefore we never cease to participate in trade fairs organized in either Turkey or abroad.

The main principles of our company are ‘Intelligent Design’ and ‘Shared Responsibility’. Following these principles, we continue our journey as a credible Turkish brand in production of locks, hinges and accessories for;

* Electrical Cabinets,

* Machinery Covers,

* Server Cabinets,

* Generator and Compressor Cabinets and

* Fire Cabinets.

We aim to achieve even greater successes with the support of our customers and employees.

We have full trust in our experience, respectful business relations and design capabilities.

What we have achieved so far is the evidence of what we will achieve in the future.
